Raindance®

Raindance® – the new way of showering and how it came about

It is mostly the simple everyday things that gives life its colour, sound and taste, and determines how we feel. In the morning, when the dreams of the night meet the first thoughts of the day, water brings us back to life. Then, in the evening, when we simply wash off the burdens of the day, we can close our eyes and once again find our true selves.

Most simple ideas are the best. For example Raindance – the realisation that a larger shower can do much more. Or AIR – that water enriched with air can do a lot more for our skin and our wellbeing. We at Hansgrohe dedicate ourselves to these little things, day by day, drop by drop and have been doing so for more than 100 years ... Just so that you can really enjoy your shower. Every day anew.

Richard Grohe

Richard Grohe
Brand manager Hansgrohe

The poetry of showering

Showering makes you clean. Bathing does too. However, showering is something completely different. It not only cleanses your body, but also your soul; it not only washes your hair, but also your head; it not only massages your muscles and tendons or firms your skin, but also awakens new energy...

Is it any wonder? Where else does water provide us with such a complete sensual and physical experience than in the shower? Hot or cold, drumming loudly or flowing silently, patting us on the shoulders or caressing our cheeks, this element of life leads us back to our selves. Our surroundings disappear as if behind a curtain, we get closer to our true selves and, supported by the melodic rhythm of the water, we allow ourselves to drift into a state of meditation.

We experience how worries, problems and burdens flow from us and disappear into the small hole in the floor. At the same time, positive aspects, plans and affections become much clearer, gaining sharper contours. One's whole being stretches out, like a branch dripping with melting snow.

Such special moments deserve exceptional products!

Raindance® – the Design Innovation

Form follows function. Seldom has this statement rung more true than for the design of the Raindance hand shower. The idea was to unite the expansive shower spray of an overhead shower plate with the flexibility of a hand shower. The result is a shower revolution – and a completely new product standard. With an extremely large diameter, super-flat silhouette, short grip and three

times the size of a traditional hand shower, Raindance has revolutionised form and function. Shower fun XXL – for the joy of the user. Following the trend of using reduced minimalistic forms in architecture and product design, the Raindance designers created a version with puristic lines based on the elegant original shape. Spoilt for choice!

Powered by AIR

At Hansgrohe every drop counts. Impressive proof of this is the latest technological innovation – AIR, from now on is used in all Raindance showers. Mixed with air, the out-flowing water becomes softer or harder, depending on the spray mode – and the daily shower becomes a feast for the senses. For your eyes: You can truly see the enclosed air in the voluminous drops. For your ears: Like a shower of rain, the AIR sound has a calming as well as vitalising effect. And for the skin, our largest and most sensitive sense organ: The water enriched with air completely covers the body in a pleasant layer of water and air. “Powered by AIR” – with this unique technology Hansgrohe creates a new quality and sets a new shower standard. Mixing it with air reduces water consumption by about 10 % and improves the quality of the spray jet.

The AIR principle: 1 litre of water is enriched with 3 litres of air in the shower head. The result: Millions of warm, soft rain drops with Rain AIR, strong massage jet with Whirl AIR.

AIR can do more

Water is multi-faceted. It can caress and pamper, but also massage and awaken. The innovative AIR technology uses this diversity for new, different spray modes. The choice is yours: With **Rain AIR**, the softly flowing water becomes even gentler, and large voluminous drops of air make the water seem even softer – thus merely showering is transformed into moisturising skin care. **Whirl AIR**: is completely different: Here, the air accelerates the jets of water to an intense massage experience – millions of impulses drum onto your body and give you new energy. **Balance AIR**, on the other hand, offers a pleasant mix of soft shower rain and a strong water jet – ideal, for example, to rinse your hair.

Rain AIR: Air is drawn in all over the shower head and mixed with the inflowing water... 1 litre of water with around 3 litres of air! Consequently, the drops become larger, lighter and softer.

Whirl AIR: Here also water is mixed with air. In a very small space, the air is compressed and the out-flowing massage jet accelerated. The result is a very powerful, intense massage.

Bigger simply is better

What is showering all about? Firstly it is about getting wet. The logical conclusion: shower pleasure increases with the size of the shower head. Thus the Raindance idea was born – expansive spray discs for expansive shower rain. The same amount of water is distributed more efficiently, and the body more completely “enrobed”. Raindance bursts all dimensions, not only with hand showers, but also with overhead showers – right up to the impressive Rainmaker, which establishes a completely new category of showers. Together with innovative shower systems such as the Raindance Allrounder or Rainbow, countless new possibilities arise.

Raindance® E

Raindance
E 150 AIR 3jet

The right one for every one

Furnished with AIR technology and the three spray modes Rain AIR, Whirl AIR and Balance AIR, the Raindance hand showers stand for splendid shower rain to suit individual preferences. You can choose between the three different sizes 100, 120 and 150, and also between two different style worlds: "E" – with

Raindance® S

XXL
100

soft, organic sweeping lines or "S" – in a reduced, geometrical use of forms. Whichever size or style world you choose – all models have the same technical advantages.

Raindance® Allrounder

The innovative 3-in-1 shower system

Its unconventional exterior is only the first indication that the Raindance Allrounder is an innovative, multi-functional shower system. It is hand, overhead and side shower in one – 3-in-1, and very easy to use: Hooked into the Allrounder, the Raindance E 150 AIR 3jet, with its 53 cm wall clearance, can be used as a height-adjustable overhead shower. With the Rain AIR mode, the water flows centrally and all over you from above. One movement and the overhead shower becomes a side shower, especially useful when combined with the massage function Whirl AIR for showering the back. Simply screwed onto the wall, the Raindance Allrounder can be modified any time and is flexible for new shower applications, as it can be exchanged with existing hand showers.

powered by AIR

Raindance® Unica®

The full body shower system

Innovative, functional, stylish – and ideal as part of a bathroom renovation. With its wide flat profile, the Raindance Unica wall bar covers up any existing holes in the wall. Together with the Raindance hand shower it is an unbeatable combination: When inserted into the self-resting slider, the Raindance becomes an overhead shower where the large overhang guarantees optimal water coverage. When positioned as a side shower, especially with the extra long Unica 150, that allows innovative shower applications: Because both hands are free, you can have your lumbar area, thighs and calves massaged or even enjoy the shower rain in a comfortable seated position. And, thanks to this height-adjustability, the Unica 150 is much appreciated by all family members, especially children.

Rainbow Shower System

The bow from hand to overhead shower

Large overhead showers are the trend. However, in situations when a concealed installation is not possible, the Rainbow Shower System is a brilliant alternative for an exposed installation – also ideal when renovating. The generosity of the overhead shower plate function and the flexibility of a hand shower are convincingly combined in one system. Now equipped with the three jet hand shower Raindance S 150 AIR 3jet, the hand shower, wall bar and support bow melt into a compact, integral unit. With the shower hose tidied away and mounted high above at the support bow, the shower has a greater distance to your head: In this way, you can enjoy the expansive shower rain to the full extent and the shower hose stays away from your body. The elegant, reduced design of the Rainbow Shower System is a prime example of restraint, and its slender silhouette also fits into small bathrooms and cubicles.

Overhead
shower function

Back shower
function

Hand shower
function

Overhead shower: With its 410 mm wall clearance, the Rainbow Shower System provides ample freedom of movement and a shower rain coming centrally from above.

Body shower: As a side shower, Rainbow covers the complete body length from back to lumbar area.

Hand shower: Un-hooked from the Rainbow Shower System, the Raindance S 150 AIR 3jet can be used as a hand shower.

Raindance® Shower Panel®

The flattest Shower Panel®

Highly aesthetic in its design, highly functional in its operation – the Raindance Shower Panel® sets a standard. Thanks to the iBox universal, it is, with a distance to the wall of only 33 mm, the flattest Shower Panel® for concealed installation presently on the market. Its excellent design captivates by the flat silhouette of its aluminium profile, which melts into a stylish unit with fittings, showers and shower hose. Thanks to its discreet form, it nicely fits into any bathroom ambiance and also immensely increases the value of bathrooms with smaller shower cabins. Not flat at all is the enjoyment provided by the Raindance Shower Panel: With the extra-large Raindance E 150 AIR 3jet hand shower, eight powerful side showers and a diversity of different spray modes, everything is possible – from a pleasant rain shower to a powerful full body massage. This is Shower Fun XXL!

All over shower: Enrobed from head to toe in a pleasant layer of water – a convincing ensemble of all showers.

Rain shower: Extra-wide, soft plate overhead shower rain, covering the whole body directly from above.

Neck-Shoulder massage: Depending on the distance to the shower, the Whirl AIR jet massages certain points or all over – ideal for releasing tensions in your muscles.

Hand shower: For manual body washing, the Balance AIR jet is the most suitable one, combining the Rain AIR jet and a light Whirl AIR massage.

Raindance® AIR

Plate overhead showers

The best comes directly from above

Gone are the times when large plate overhead showers could only be found in expensive Wellness centres. Raindance also brings this pleasure into your own bathroom, complete with AIR technology, which allows you to experience your shower as a true shower rain, not as a needle-like jet, but in soft, voluminous drops. Suitable for mounting on the ceiling or on the wall, the Raindance plate overhead showers provide you with the optimal downpour effect. This means, the water pours down centrally and directly from above all over your head and shoulders. The effect: Your whole body is wrapped in a true cloak of water and you experience a completely new and more intensive sensation of warmth. Try it yourself with the Raindance AIR overhead shower, available in a remarkably wide 180, 240 and 350 mm diameters.

Raindance AIR 240 mm

Raindance® Royale AIR **A royal shower experience**

Puristic in design, discerning in materials and graceful in looks: This is how the Raindance Royale AIR presents itself – the ultimate in shower design and Showerfun. With a diameter of 350 mm and an unbelievable 225 stream openings, it truly promises a right royal feast of water. The extra-large plate overhead shower is available as a fitted complete solution with a Highflow thermostat on the base of the ibox universal – for increased shower fun. The exclusive design comes from our Manufaktur, where the Raindance Royale AIR

is brought to perfection with lots of time and care by expert hands. At the end of the day, it is your bathroom.

Raindance® Rainmaker **Shower Fun in new dimensions**

The new Raindance Rainmaker exceeds all previous showering possibilities. Voluminous streams, water, air, light and space. With an unbelievable diameter of 600 mm, the Rainmaker is already from its appearance more than a “normal” overhead shower – rather a multi-functional shower system unlike any other. Installed flush with the ceiling and, despite its size, discreet in design, the Rainmaker becomes an attractive architectural room element. Once in action, there is no holding back: Water everywhere, mixed with lots of air. Everyday life dissolves. Life and vitality return. At last, space for body and soul.

Size, air, light and diversity

Shower Fun XXL, in the middle with a diameter of 300 mm or across the whole width of 600 mm, the three expansive Whirl AIR massage jets can be used individually and also added to the stream at any time. The optional lighting of the Rainmaker bathes the raindrops in an atmospheric light. With the concealed Highflow thermostat on the base of the ibox universal Hansgrohe offers a technically sophisticated complete solution. The complete spray surface of the Rainmaker is of course equipped with the Rubit anti lime scale function. Now the fun can start ...
